About me

Recently graduated from IT engineering degree. Seeking for a software developer position with the aim of obtaining work experience to develop my technical and soft skills. I trust that everything I have learned in educational institutions, as well as in a self-taught way can be useful for your company.

Education

Instituto Politécnico Nacional – Unidad Profesional Interdisciplinaria de Ingeniería y Ciencias Sociales y Administrativas

2016 – 2021

University - Bachelor's degree in "IT".

Instituto Politécnico Nacional – Centro de Estudios Científicos y Tecnológicos 9 "Juan de Dios Bátiz"

2012 – 2015

High School -Technical degree in "Programming".

Tecla Coding Academy

May – July 2021

Certification in Node.js backend (Express.js, SQL) working under SCRUM agile methodology

Experience

Service Proxies Support – Gentera

August 2021 – Present

Support, configuration and deployment of service proxies made in Spring to connect different APIs inside the organization and translate requests from SOAP to REST.

Mapping and documentation using Swagger/OpenAPI Specification and Postman.

Social service - IPN CIITA Veracruz

February - September 2021

Development of a web page with other students to support tourism in the city of Papantla, Veracruz.

Information was collected and processed to be displayed dynamically on the page.
